An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Rae-Venter on or about 7/28/99.

Claims 35 and 75 have been can canceled.

The following is an examiner's statement of reasons for allowance:

This application was reviewed to determine whether the rejections remain tenable in view of recent court decisions and examination guidelines promulgated by the PTO. During the course of the review, it was determined that allowable subject matter is present. The reasons for withdrawing the rejections of record are as follows: The claimed invention is drawn to further methods of making/regulating fatty acids and their production in plants with recombinant constructs encoding delta 9 desaturase genes by specific nucleotide and/or amino acid sequence (see instant Figure 1), which genes had been found to free of the prior art and issued in applicants' related U.S. Patent 5,723,595, Thompson et al. The restriction requirement of record mailed on 10/9/92, which restricted the instant method claims from the DNA constructs encoding delta 9 desaturases, precludes the need to raise any double patenting.

Any comments considered necessary by applicant must be submitted no later than the
